

Introduction: The chart below outlines the content of the grade-by-grade, month-by-month structure of this curriculum guide.

Grade:	Standard	Benchmarks	Essential Learning Expectations	Vocabulary	Assessment	Reporting
August/September	Content standards indicate what all students should know, understand, and be able to do. Individual Library-Information Literacy Standards 1-5 are emphasized on a month-by-month, grade-by-grade basis.	Benchmarks define our expectations for students' knowledge and skills along a developmental continuum in each content area. That continuum is focused at three points – the end of grade 4, the end of grade 8, and upon graduation (grade 12).  The Essential Learning Expectations are specific statements of what all students should know and be able to do at a grade level. They describe a learning progression leading to a Benchmark.  Terms in the Vocabulary column represent the words and ideas that a teacher and/or student should understand in relation to the ideas contained in the benchmarks and ELE statements. For Information Literacy/Library Media Content Standards 1, 2, and 3 the terms "plan," "do," and "review" refer to the Super3™ steps. Beginning in Grade 3, the Big6™ steps are introduced in the Vocabulary column. Visit <a href="http://www.big6.com">www.big6.com</a> for resources			Suggested assessment strategies will appear in each grade level and month table.  Comprehensive systems of assessment, formative to summative, include formal and informal assessment as well as student generated evidence of learning.	Suggested reporting tools and approaches will appear in each grade level and month table.

### Performance Rubrics

The rubrics contained in this framework establish a set of criteria describing students' performance, along a continuum from novice to advanced, that define how well they apply the knowledge and skills contained in the Essential Learning Expectations (ELE). In order to use these generic, analytical rubrics the teacher-librarian or classroom teacher must revise and customize them for specific tasks and assignments. Performance levels define the achievement in broad, general terms and address the question: "How well does a student apply the skills and processes expressed in the standards?" Novice level denotes that the student is beginning to attain the prerequisite knowledge and skills that are fundamental for work at each benchmark. Nearing Proficiency denotes that the student has partial mastery or prerequisite knowledge and skills fundamental for proficient work at each benchmark. "Proficient" denotes solid academic performance for each benchmark. Students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter. "Advanced" denotes superior performance.

### Indian Education for All Resources

In addition to providing alignment to the Montana Common Core Standards for Mathematical Practices and the English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects, this guide provides a list of suggested Indian Education for All resources. The lists are not exhaustive or complete, but they suggest rich information and context for students to build awareness of the [Essential Understandings Regarding Montana Indians](#) and make connections to Montana's cultural heritage. Complete lists of materials provided to schools by the OPI Indian Education Division can be found on the OPI Web site at:
